

Table of Contents

Foreword	xiii
-----------------------	-------------

Preface	xvii
----------------------	-------------

Part I. ActionScript Fundamentals

1. A Gentle Introduction for Non-Programmers	3
Some Basic Phrases	5
Further ActionScript Concepts	13
Building a Multiple-Choice Quiz	22
2. Variables	38
Creating Variables (Declaration)	38
Assigning Values to Variables	42
Changing and Retrieving Variable Values	43
Types of Values	45
Variable Scope	47
Loading External Variables	59
Some Applied Examples	61
3. Data and Datatypes	63
Data Versus Information	63
Retaining Meaning with Datatypes	63
Creating and Categorizing Data	64
Datatype Conversion	67
Primitive Data Versus Composite Data	73
Copying, Comparing, and Passing Data	74

4. Primitive Datatypes	78
The Number Type	78
Integers and Floating-Point Numbers	78
Numeric Literals	78
Working with Numbers	83
The String Type	84
Working with Strings	89
The Boolean Type	106
Undefined	108
Null	109
5. Operators	112
General Features of Operators	112
The Assignment Operator	116
Arithmetic Operators	117
The Equality and Inequality Operators	121
The Strict Equality and Inequality Operators	126
The Comparison Operators	128
The Flash 4 String Operators	131
The Logical Operators	132
The Grouping Operator	137
The Comma Operator	138
The void Operator	138
Other Operators	139
6. Statements	145
Types of Statements	145
Statement Syntax	146
The ActionScript Statements	148
Statements Versus Actions	155
7. Conditionals	156
The if Statement	157
The else Statement	158
The else if Statement	160
The switch Statement	161
Simulating the switch Statement in Flash 5	163
Compact Conditional Syntax	163

8. Loop Statements	165
The while Loop	165
Loop Terminology	168
The do-while Loop	169
The for Loop	170
The for-in Loop	172
Stopping a Loop Prematurely	174
Timeline and Clip Event Loops	176
An Alternative to Timeline Loops: setInterval()	181
9. Functions	183
Creating Functions	184
Running Functions	184
Passing Information to Functions	185
Exiting and Returning Values from Functions	190
Function Literals	192
Function Availability and Life Span	194
Function Scope	196
Function Parameters Revisited	200
Recursive Functions	204
Nested Functions	206
Built-in Functions	209
Functions as Objects	210
Centralizing Code	214
The Multiple-Choice Quiz Revisited	214
10. Events and Event Handling	221
Synchronous Code Execution	221
Event-Based Asynchronous Code Execution	221
Types of Events	222
Event Handling	223
Event Handler Properties	223
Listener Events	226
Flash 5's on() and onClipEvent() Handlers	229
Event Handler Lifespan	232
Event Handler Scope	232
Values of the this Keyword	238
Flash 5-style onClipEvent() Order of Execution	238
Copying Movie Clip Event Handlers	240

Refreshing the Screen with <code>updateAfterEvent</code>	241
Code Reusability	242
Dynamic Movie Clip Event Handlers	243
Event Handlers Applied	244
11. Arrays	247
What Is an Array?	247
The Anatomy of an Array	248
Creating Arrays	249
Referencing Array Elements	252
Determining the Size of an Array	253
Named Array Elements	255
Adding Elements to an Array	257
Removing Elements from an Array	262
General Array-Manipulation Tools	265
Arrays as Objects	270
Multidimensional Arrays	271
The Multiple-Choice Quiz, Take 3	272
12. Objects and Classes	275
The Anatomy of an Object	278
Instantiating Objects	279
Object Properties	280
Object Methods	282
Classes and Object-Oriented Programming	282
Using Standalone Object Instances as Associative Arrays	301
The Almighty Prototype Chain	303
Built-in ActionScript Classes and Objects	312
OOP Quick Reference	315
Further Topics	320
Simulating Namespaces	321
The Multiple-Choice Quiz, OOP Style	322
13. Movie Clips	326
The “Objectness” of Movie Clips	327
Types of Movie Clips	328
Creating Movie Clips	331
Movie and Instance Stacking Order	341
Referring to Instances and Main Movies	346

Removing Clip Instances and Main Movies	358
Method versus global function overlap issues	361
Drawing in a Movie Clip at Runtime	363
Using Movie Clips as Buttons	365
Input Focus and Movie Clips	367
Building a Clock with Clips	369
14. Movie Clip Subclasses and Components	374
Creating the Library Symbol	377
Creating and Invoking the Subclass Constructor	378
Assigning the MovieClip Superclass	380
Packaging Subclass Code and Library Symbols Together	381
Making Movie Clip Components	382
MovieClip Sub-Subclasses	388
Summary	390
15. Lexical Structure	393
Whitespace	393
Statement Terminators (Semicolons)	394
Comments	396
Reserved Words	397
Identifiers	398
Case Sensitivity	399
16. ActionScript Authoring Environment	401
The Actions Panel	401
Adding Scripts to Frames	403
Adding Scripts to Buttons	405
Adding Scripts to Movie Clips	406
Where's All the Code?	407
Productivity	408
Externalizing ActionScript Code	408
Defining Components	410
17. Building a Flash Form	420
The Flash Form Data Cycle	420
Creating a Flash Fill-in Form	423

Part II. Language Reference

18. ActionScript Language Reference	435
Global Functions	436
Global Properties	436
Built-in Classes and Objects	437
Entry Headings	438
Alphabetical Language Reference	439

Part III. Appendixes

A. Resources	971
B. Latin 1 Character Repertoire and Keycodes	977
C. Backward Compatibility and Player Build Updates	984
D. Differences from ECMA-262 and JavaScript	995
E. HTML Support in Text Fields	998
F. Support for GET and POST	1008
G. Flash UI Component Summary	1010
H. Embedding a Flash Movie in a Web Page	1019
Index	1025
